

KHARISMAWAN RAMADHAN

PROJECT MANAGER, DATA OPERATIONS • IDENTITY AI & eKYC FRAUD OPERATIONS

Indonesia | +62 813-8092-7827 | kharismawan.ramadhan@gmail.com | Portfolio: Identity Review Ops

PROFESSIONAL SUMMARY

Results-driven Project Manager in Data Operations with **7+ years of specialized experience** directing the human operational layer for enterprise machine learning pipelines and eKYC fraud prevention at **PT Advance Intelligence Indonesia**. Proven track record leading end-to-end data annotation delivery, multi-vendor manual review operations (2 dedicated vendors, 40+ reviewers), and adversarial red-team stress testing across 5+ core eKYC models (biometric liveness, document forgery detection, face compare, IQA, and OCR). Adept at establishing SLA benchmarks, scorecard auditing, shift scheduling, and procurement workflows (Coupa PR/PO/invoice matching and annotator payroll reconciliation).

CORE COMPETENCIES & EXPERTISE

Identity & Biometric AI Ops:	eKYC Pipelines, Biometric Liveness Spoof Detection, Document Forgery Authentication, Face-to-Document Match, Image Quality Assessment (IQA), OCR Extraction, Deepfake & Screen Replay Red-Teaming.
Operations Leadership:	Multi-Vendor Operations (2 Vendors, 40 Reviewers), Workforce Capacity Planning, Shift Scheduling, Average Handling Time (AHT) Optimization, Quality Control (QC) Loops, Crowdfunding Campaigns.
Financial & Stack Governance:	Coupa Procurement Lifecycle (PR / PO / Invoicing), Monthly Annotator Payroll Reconciliation, Agent-Assisted Task Automation, SLA & KPI Metric Reporting.

PROFESSIONAL EXPERIENCE

PT ADVANCE INTELLIGENCE INDONESIA

Jakarta, Indonesia
2019 – Present (7+ Years)

Project Manager, Data Operations — Data Annotation & Identity Review

Direct the human-in-the-loop operational layer translating R&D machine learning requirements into high-accuracy labelled datasets, manual verification workflows, and adversarial fraud evaluations for enterprise eKYC identity products across Southeast Asia.

- Managed End-to-End Annotation Deliveries:** Formulated data specifications, task architectures, annotator quality scorecards, and scheduling across multi-modal computer vision and identity datasets under demanding R&D sprint cycles.
- Directed Manual Review Platform (MRP) Operations:** Built and led review operations across 2 dedicated external vendor partners comprising 40+ reviewers, driving recruitment, shift planning, handle-time compression, and quality auditing.
- Spearheaded Fraud Red-Team Adversarial Testing:** Executed proactive fraud simulation testing simulating attack vectors—including biometric liveness injection attacks, high-fidelity 3D masks, screen replay recordings, and deepfake synthesis—filing critical vulnerability insights directly to R&D product teams.
- Oversees Enterprise Procurement & Payroll Close:** Administered monthly annotator payroll settlement and vendor contractor finances via Coupa, managing PR, PO, invoice matching, and approval pipelines with 100% on-time cycle completion.
- Conducted Production Crowdfunding Campaigns:** Recruited and coordinated field test cohorts against beta R&D applications to evaluate real-world biometric liveness, edge lighting conditions, and camera hardware variance before market rollout.

KEY IDENTITY PROGRAMS & OPERATIONAL PORTFOLIO

- Manual Review Platform (MRP)** (Workforce Ops): Orchestrated operations across 2 vendors and 40 reviewers, implementing training curriculum and QA scorecards that minimized error rates while meeting strict SLA targets.
- Biometric Liveness & Anti-Spoofing** (eKYC Product): Executed structured fraud simulations against biometric liveness algorithms using physical silicon masks, 3D printed molds, and video playback replays.
- Face Compare & Onboarding Review** (Core Ops): Governed face-to-document match verification operations, preventing identity takeover and synthetic impersonation before onboarding approval.
- Document Forgery & Tamper Analysis** (Core Ops): Audited ID cards, passports, and driver licenses for digital tampering, pixel artifacts, recapture anomalies, and composite forgery indicators.
- IQA (Image Quality Assessment) System** (Product QA): Formulated image rejection thresholds for motion blur, flash glare, aspect distortion, and improper crop boundaries to preserve model inference accuracy.
- OCR Extraction Verification** (Data Ops): Conducted field-level validation on extracted identity text (alphanumeric credentials, names, dates of birth) against official document sources.
- Ops Automation & Agent Workflows** (Internal Tools): Implemented agent-assisted workflows (Cursor, Claude Code, custom automations) to automate annotation task distribution and streamline payroll reconciliation cycles.

TOOLS & TECHNOLOGIES

Operations & Procurement: Coupa, Custom Annotation Platforms, Manual Review Portals, Shift & Payroll Systems.

AI & Automation: Cursor, Claude Code, OpenCode, OpenClaw, Hermes Agent, n8n Workflow Automation.

Self-Hosted Infrastructure: Immich, Nextcloud, Docker, Linux Server Administration.

EDUCATION

UNIVERSITAS GUNADARMA

Bachelor of Engineering (B.Eng.) in Industrial Engineering (S1 Teknik Industri)

Depok / Jakarta, Indonesia
Graduated
